

# This vehicle's air conditioning system contains - R1234yf refrigerant

**Boiling Point** -29°C

**Critical Point** 95°C

**Safety Classification** A2L Mildly Flammable

**Safety Considerations:** R1234yf is a flammable refrigerant. Only use equipment that is ignition proof and meets relevant SAE Standards.  
Use appropriate Personal Protective Equipment (PPE).  
Ensure no open flames are near the system (including smoking).

**Before working with any refrigerant, please refer to vehicle manufacturers' recommendations, industry standards, codes of practice and material safety data sheets.**

## This vehicle's air conditioning system contains – R744 refrigerant

**Boiling Point** -78°C

**Critical Point** 31°C

**Safety Classification** A1 Non-Flammable

**Safety Considerations:** High operating pressure. Contact with R744 can cause burns. Use Personal Protective Equipment (PPE). System-specific safety procedures must be followed. Don't handle this refrigerant in a confined space. If released, overexposure to R744 can cause drowsiness, asphyxiation, and in extreme cases, death.

**Before working with any refrigerant, please refer to vehicle manufacturers' recommendations, industry standards, codes of practice and material safety data sheets.**
